Aharada Kaushal Kumbh 2026

Team Project Submission Form

AI & ML Hackathon | Powered by Aharada Education / IIMT University

Section 1 — Team Information

Team Name

PulseGuard

Team Leader Name	University / College Name
Manichand Gupta	IIMT University (SoCSA)

Contact Number	Email Address
+917266913997	Manichand.gupta.contact@gmail.com

Problem Statement Selected

Please tick the applicable box:

☑ PS1 — Healthcare & Diagnostics	[ ] PS2 — Intelligent Supply Chain
[ ] PS3 — GenAI for Education	[ ] PS4 — Smart Agriculture
[ ] PS5 — Sustainable Smart Cities	[ ] PS6 — Open Innovation

Section 2 — Team Members

List all team members (3 to 5). The team leader should be listed as Member 1.

#	Full Name	University / College	Email Address	GitHub Profile URL
1	Manichand Gupta	IIMT Universit	Manichand.gupta.contact@gmail.com	https://github.com/EclipseManic
2	Kaushal Yadav	IIMT Universit	Yadavkaushal2023@gmail.com	https://github.com/kaushalyadav2006
3	Ansh Sharma	IIMT Universit	as7793557@gmail.com	N/A

Section 3 — Project Details

Project Title

GuardianPulse Emergency Escalation Simulator

Problem Statement — What challenge are you solving?

Describe the real-world problem clearly. Who is affected? What are the consequences?

Aharada Kaushal Kumbh 2026

Team Project Submission Form

AI & ML Hackathon | Powered by Aharada Education / IIMT University

In medical emergencies, delayed response and miscommunication between the victim, family, and emergency services can cost lives. Millions of people in India lack a reliable, automated way to alert their contacts and escalate to emergency services (102) when they are incapacitated or in danger. The consequences include delayed hospital arrival, uninformed family members, and preventable deaths.

Proposed Solution — How does your project solve the problem?

Explain your approach: ML model used, data pipeline, key features, and expected impact.

GuardianPulse is a real-time emergency escalation simulator that automates a timed alert chain when a user triggers the PUSH button. Within 60 seconds, it sequentially sends SMS/WhatsApp/Email alerts, shares the user's photo, audio, and video with family, contacts nearby hospitals, and finally escalates to 102. The PULL button cancels the alert and broadcasts a user-safe notification. The system is built as a full-stack prototype with a FastAPI backend and a live dashboard frontend.

Dataset Used

Mention the source(s) of your dataset(s). You are responsible for collecting your own data.

No external dataset is used. The project uses synthetic/mock data for simulation purposes including mock hospital listings and simulated API responses. All simulation data is self-generated.

ML / AI Technique Used *e.g. Random Forest, LSTM, Transformer*	Tech Stack / Tools *e.g. Python, TensorFlow, Flask, Streamlit*
Rule-based timed escalation logic (no ML model; simulation prototype)	Python, FastAPI, HTML, CSS, JavaScript, Leaflet.js, Uvicorn

Section 4 — GitHub Project Repository

All team members must share their individual GitHub profile links in Section 2. Submit one public team repository below. The repository must be accessible by the judges.

Team GitHub Repository URL

Must be a public repository. Example: https://github.com/your-team/project-name

https://github.com/kaushalyadav2006/GuardianPulse

Brief Repository Description (README summary)

What will someone find when they open the repository? Mention key files and notebooks.

The repository contains a FastAPI backend simulating the emergency escalation state machine, a frontend dashboard with PUSH/PULL controls, a live Leaflet.js map showing nearby hospitals, and a one-command Python launcher (run-all.py) to start all services locally. Key files: backend/, frontend/, run-all.py, README.md, Project-Documentation.md.

Section 5 — Declaration & Signatures

Aharada Kaushal Kumbh 2026

Team Project Submission Form

AI & ML Hackathon | Powered by Aharada Education / IIMT University

We, the undersigned team members, declare that:

1. The project submitted is our original work and has not been copied from any other source.
2. We have collected our own data and have not used any datasets provided by the organizers.
3. Use of AI tools (ChatGPT, GitHub Copilot, etc.) has been acknowledged and the core logic is our own.
4. We agree to abide by all rules and guidelines of Aharada Kaushal Kumbh 2026.

Team Leader Signature	Date
Manichand Gupta	01/04/2026

Team Leader Name (Print)
Manichand Gupta
